Schrittweise Minus rechnen

Zerlege die rechte Zahl in **Zehner** und **Einer**. Ziehe dann beides nacheinander ab.

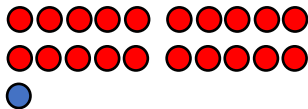

$$\begin{array}{r} 58 - 26 = 32 \\ 58 - 20 = 38 \\ 38 - 6 = 32 \end{array}$$

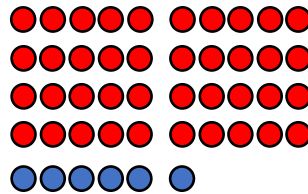

$$26 = 20 + 6$$

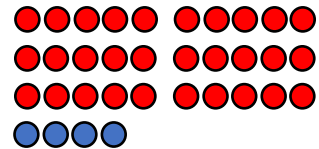

1. Rechne nacheinander in Schritten, wie der Igel. Das Punktefeld hilft dir beim Zerlegen in **Zehner** und **Einer**.

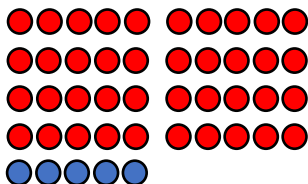

6	3	-	2	1	=	4	2
6	3	-	2	0	=	4	3
4	3	-	1	=	4	2	

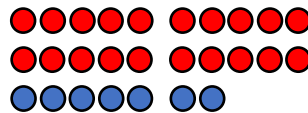

9	8	-	4	6	=	5	2
9	8	-	4	0	=	5	8
5	8	-	6	=	5	2	

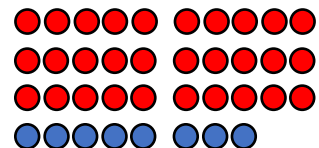

7	6	-	3	4	=	4	2
7	6	-	3	0	=	4	6
4	6	-	4	=	4	2	

8	4	-	4	5	=	3	9
8	4	-	4	0	=	4	4
4	4	-	5	=	3	9	

3	5	-	2	7	=	8	
3	5	-	2	0	=	1	5
1	5	-	7	=	8		

6	6	-	3	8	=	2	8
6	6	-	3	0	=	3	6
3	6	-	8	=	2	8	

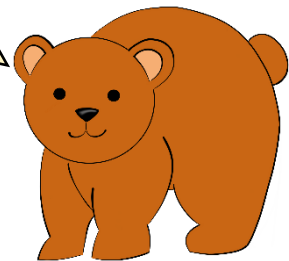

2. Rechne wieder mit **Zehnern** und **Einern** in Schritten, wie der Igel.

$67 - 52 = 15$	$39 - 26 = 13$	$86 - 63 = 23$
$67 - 50 = 17$	$39 - 20 = 19$	$86 - 60 = 26$
$17 - 2 = 15$	$19 - 6 = 13$	$26 - 3 = 23$
$91 - 72 = 19$	$70 - 25 = 45$	$42 - 14 = 28$
$91 - 70 = 21$	$70 - 20 = 50$	$42 - 10 = 32$
$21 - 2 = 19$	$50 - 5 = 45$	$32 - 4 = 28$
$55 - 38 = 17$	$24 - 19 = 5$	$36 - 18 = 18$
$55 - 30 = 25$	$24 - 10 = 14$	$36 - 10 = 26$
$25 - 8 = 17$	$14 - 9 = 5$	$26 - 8 = 18$
$74 - 46 = 28$	$53 - 27 = 26$	$92 - 58 = 34$
$74 - 40 = 34$	$53 - 20 = 33$	$92 - 50 = 42$
$34 - 6 = 28$	$33 - 7 = 26$	$42 - 8 = 34$

Manchmal ist es schlau, mit **Nachbarzahlen** zu rechnen. Ziehe erst 1 zu viel ab. Gib die 1 danach wieder dazu, damit das Ergebnis stimmt.

$$\begin{array}{r} 67 - 49 = 18 \\ 67 - 50 = 17 \\ 17 + 1 = 18 \end{array}$$

3. Rechne mit **Nachbarzahlen**, wie der Bär.

$43 - 29 = 14$	$65 - 49 = 16$	$97 - 69 = 28$
$43 - 30 = 13$	$65 - 50 = 15$	$97 - 70 = 27$
$13 + 1 = 14$	$15 + 1 = 16$	$27 + 1 = 28$
$56 - 19 = 37$	$82 - 59 = 23$	$74 - 39 = 35$
$56 - 20 = 36$	$82 - 60 = 22$	$74 - 40 = 34$
$36 + 1 = 37$	$22 + 1 = 23$	$34 + 1 = 35$
